## For Ultimate Dual-Band Wireless Network Deployment

- Dual Band Wireless IEEE 802.11a/g
- Four Operation Modes: AP, Repeater, Bridge and Wireless Client
- Wi-Fi Certified WPA/WPA2
- Support OTIST in Both AP and Client Modes for Easy Connection Setup

### Benefits

#### Dual Band Wireless Access

The G-570U complies with IEEE 802.11a/g standards to offer dual-band (2.4GHz or 5GHz) wireless connectivity.

In dense wireless networks, use IEEE 802.11a in the 5GHz frequency range for high-speed transmission. In addition, with IEEE 802.11a, you don't have to worry about interference from Bluetooth systems or home appliances (such as microwave ovens and cordless phones).

#### Flexible Deployment

The G-570U works as an AP, Repeater, Bridge, or a wireless client. Simply choose G-570U's operating mode for your desired network application.

#### Wi-Fi Certified Compatibility and Security

For interpretability with other wireless devices and maximum security, the G-570U supports Wi-Fi certified WPA/WPA2 security features to ensure secure wireless communication.

#### Set Up and Secure Your Wireless Network with One-Touch

With OTIST, your G-570U can automatically obtain and synchronize wireless network settings with an OTIST-enabled wireless router/adapters. When the G-570U works in wireless client mode with OTIST, you get instant and secure Internet connection for network devices such as game consoles and printers with simple mouse clicks.
